Free sprinkler nozzles available July 1

RIVERSIDE, Calif. – Free water-saving sprinkler nozzles will be available to Riverside water customers starting tomorrow.

The Toro Precision Series Spray Nozzle can cut water usage for landscapes by up to 20 percent using new technology that allows the water to be more efficiently distributed. Developed by Toro at their headquarters in Riverside, this device is free only to Riverside Public Utilities water customers or Western Municipal Water District customers who live in Riverside.

“Lawn care is a large drain on water supplies, especially during the summer,” said Ward 5 City Councilmember Chris Mac Arthur. “This nozzle is simple to install, cuts back on the water used, and the lawn looks great, too.”

Until Sept. 30, residents can get 25 free nozzles. Businesses can receive up to 100 free nozzles. Toro designed to adapt to all major pop-up sprinkler brands.

To get the free nozzles, customers can visit www.FreeSprinklerNozzles.com and enter their RPU or Western Municipal Water District customer account number to apply. A voucher is sent via e-mail and can be redeemed at three irrigation vendors in the city: John Deere Landscapes, Ewing Irrigation and Bonnett Irrigation.

This offer is good while supplies last, so customers are urged to apply as quickly as possible.

###

Established in 1895, Riverside Public Utilities is a consumer-owned water and electric utility governed by a board of nine community volunteers that provides high quality, reliable services to over 106,000 metered electric customers and 64,000 metered water customers throughout the City of Riverside. The Utility is committed to increased use of renewable energy resources and sustainable living practices that help reduce environmental impacts within the City of Riverside and the state of California.
